

# Fireplace and Kitchen at the Historical Centre of Cascais

Cascais, Portugal

An "old house", at the heart of Cascais, and two goals: a classic fireplace and kitchen tops in the best cream portuguese **Lioz** marble to go with the existing marble walls.

The fireplace, extraordinarily executed and finished, was made in **Blue Valley** polished limestone: a nacional limestone with an unque grey tone that is requested all over the world.

The kitchen tops were supplied in the portuguese Lioz in its extra selection. The complex extraction of the quarries and difficulty of obtaining extra Lioz were overcome by the client's will, architect by profession and the single coordinator of the remodelation, that waited for the right material and accomplished the kitchen of his dreams.
