

3 Marvelous Restrooms at Herdade do Monte Novo

Pinhal Novo, Setúbal, Portugal

3 areas; two materials each; the excellent taste of the project and of the choices... the quality production of our company. Meet this 3 bathroom project. It's worth it.

For the two first bathrooms, the common ones, the marbles chosen were **Indian Green** and **Crema Marfil** (extra selection). Each area was individually projected with different drawings and layouts, creating two unique and distinct areas and, yet, connected by the color continuity.

We have measured each bathroom respecting the ideas of the creator, the architect. The vanity tops that were supplied are authentic art-pieces and all the pavings and wallings were carefully selected, cutted and finished.

For his own ensuite-bathroom the client chose **Red Travertine** and **Crema Marfil** of an extra selection. Floor and walls were all paved in these two materials by following the layout drawn specifically for this bathroom. One should take a moment to note the detail of the dilatation-grout, necessary for technical reasons, that was made in Red Travertine. A detail of difficult execution that we have accomplished with success.
