

## Art and a Fireplace

Oliveira do Hospital, Portugal

A special fireplace. This project had our signature not only because of the chosen materials but also because of our technical assistance.

To achieve the suspended fireplace there was a great collaboration between architect, owner, constructor and our team. We talked about fixing cramps, glues, overcoming different levels of different finishing, ecc.

Each specialist on their own area and all for the same purpose that is at sight: polished **Tabaco** and natural-cleft **Black Slate** combined in an exquisite fireplace that is the centerpiece in the decoration of the house.
