

# Ensuite Restroom in Estoril

Estoril, Portugal

A large bathroom in **Thassos White** and **Red Travertine**, all polished.

The floor, in Thassos White with a Travertine strip, blends in with the simply plastered walls, such is the purity of the white of this dolomite. In the shower area, a shower tray in **Red Travertine** that also rises to cover the walls to align with the glass that delimit this wet area. The top, a single piece measuring 2.3m in length and a false thickness of 10cm, in which the hand-picked washbasin is long enough for 2 people and therefore has 2 taps. Red Travertine runs also around the large mirror, a memory of the floor and shower interconnecting materials and creating continuity in this large space.
