

Antique Table Top

Portugal

For this small project, we were not contacted by the builder, nor by the architect, nor by the owners or decorator. Rather, it was a renowned antiquarian with an interesting mission to present to us: a replica table top of an imperfect round to be executed in **Indus Gold** and **Black & Gold** marbles. It was with the utmost care that we received the top in our factory in order to have the best mold possible to execute the pieces: the original mold!
