

Golden Cream for apartment in Lisbon

Lisbon, Portugal

One material, one finishing, one result: classical beauty.

For this apartment in Lisbon, the marble **Golden Cream** was used, polished, in the pavements, walls and countertops of two bathrooms and one kitchen.

The beige-cream tonality of this material allows the creation of elegant and classy areas. Our selection guarantees the correct homogeneity between the different tiles that are used in each division. One should also notice the detail of the vanity top: two sided tall pieces in 3cm thickness Golden Cream that bring this lavatory-corner to become the master-piece of the bathroom.
