

3 Unique Bathrooms

Carnide, Lisbon, Portugal

The guest bathroom in **Onyx White** is just the visiting card for this house where 2 other toilets have been supplied by our marbles.

At the guests toilet the pavement, skirting and top are in Onyx White. There are images that are worth 1.000 words and the pictures of this area are like that. This Onyx, with translucent properties, was worked in cut-to-size pieces that would allow the continuous of the natural veining of the material. At the vanity-top a “design” lavatory with lateral taps made out of 3cm material and perfectly finished.

The ensuite bathroom, in transparent resined and polished **Beige Travertine**, is an area of excellent taste. A note to the countertop where 2 well-chosen lavatories were fit.

The marble **Blue Aquamarina** paves and walls the 3rd bathroom. Of a clear light blue shade and blue-greenish crystals, this marble creates very fresh and clean bathrooms. At the shower-basin, our design, made out from 3cm thickness material, the non-shivering area was created in stripes with the use of the sandblasted finishing.
