

# Marble Chessboard inside a Bathroom

Lisbon, Portugal

A bathroom in Lisbon with the marbles **Crema Marfil** and **Emperador Dark** creating a chess effect on the pavement.

On the walls only the shower area was covered in Emperador Dark marble comercial selection for a less expensive option. The floor is a chess of this material with the marble Crema Marfil (basic selection).

The highlight of this project is the creation of the non-shivering finish for the shower tray in checkerboard effect, achieved through a sandblasted finish applied on canvas, and the great experience of our team.
