

3 Light-Colored Bathrooms in Estoril

Estoril, Portugal

Crema Marfil, Beige Travertine and Noce Travertine: each material for each division.

The smallest toilet had a beautiful outcome in **Noce Travertine**, resined and polished finishing. Rectangular pieces of one fixed dimension for the floors and walls, and 2 cut-to-size pieces: the shower base, totally adapted to 'that corner', our design model made out from 3cm thickness material; and the lavatory top with the frontal skirt and polished profile.

In the second bathroom the format was similar but the material is **Beige Travertine** and the shower base is replaced by a bathtub.

The ensuite bathroom keeps the light color shaded warm materials but is paved and walled in **Crema Marfil** marble of quadrangular pieces of our regular stock. A classic, luminous, elegant environment.

Outside, the **Triesta** marble in the bush hammered finish creates a small well-being space, where chairs and umbrellas organize the daily rest.
