

5 Areas at Condominium Malveira-Guincho

Sintra, Portugal

Gorgeous interiors in marbles and granites of ours, matching the splendid external location of this complex.

In the *ensuite* restroom all the facings are in **Black Marquina** marble. The vanity-top, also in Black Marquina, has a frontal view of 12cm height that unites to the top with a polished “alheta”-detail.

The two bathrooms in **Emperador Dark** marble, with a big shower area walled in this material, combine with the existing creamish marble.

For the restroom the walls were supplied in cut-to-size **Indian Green** marble. The vanity-top, in the same material, is made out from a massive piece with very interesting curved design details.

In the kitchen: pavement in **Crema Marfil** marble with *cabouchonts* in **Zimbabwe** granite, the same material used for the countertops and between furniture, thus creating a very harmonious kitchen with a well-chosen conjugation of materials. Everything in the polished finishing.
