

# Forest Brown for Kitchen and Table

Sesimbra, Portugal

**Forest Brown** marble was the choice for the countertops of this kitchen in Sesimbra. Extremely decorative and passionate, this Indian material is perfectly combined with the dark-wooden closets and the inox.

In the dining-room, as a revival of the neighbor kitchen, the dining table is a simple glass top for total transparency and evidence of the supporting piece: a "table-foot" in marble Forest Brown executed with the excellence of our factories' production quality.
