

2 Beautiful Bathrooms in Restelo

Restelo, Lisbon, Portugal

Two bathrooms, two Natural Stones, 2 unique results.

In the main bathroom, the floor and walls were covered with 60x40cm **Black Slate** tile - a more economical option to be able to fly higher in the full-piece shower tray and in the wonderful piece of countertop with a ramped model washbasin in the same material.

For the children's bathroom, the hardest Portuguese limestone was chosen: **Ataija Blue**. Soft tones, countertop with a straight washbasin made of the same material, and a special bathtub supplied in one cut-to-size piece, made for that space and with 3cm thick material.

We can be proud of our team's work!
