

Amazing Villa at Quinta do Lago (Part I)

Almancil, Algarve, Portugal

An extraordinary house: beautiful architecture, radiant luminosity, and the power of travertines.

The **Travertino Romano**, timeless and unavoidable, accompanies the entire residence: it begins with the exterior cladding of the façades, continues on the floor and walls of the bathrooms, continues through the generous kitchen island, and ends on the living room shelves, solid elements with bespoke openings for led lighting.

The bathrooms (nine in total) are the stage for a play of colors in travertine tones: **Noce Travertine**, the brownish one, **Silver Travertine** with its earthy gray tones, the **Yellow Travertine**, the sunny one, and even the **Red Travertine**, with reddish brick hue. All of these are always accompanied by Travertino Romano, neutral and naturally mandatory, all with a resined and polished finish.

This house is a daily celebration of this unique material and the result is beautiful!
