

Private Villas in Gibraltar

Gibraltar, United Kingdom

For this project dimpomar has provided over 8.000m² of natural stones for 5 luxurious villas in Gibraltar.

Moca Cream Fine Grain was the main material used. A narrow split finish was used for the entrances, while the polished and honed finishes were chosen for the interior (rooms, corridors) and exterior floors (terraces, swimming pools). This Portuguese limestone was also used for stairs, parapets, walls, shower trays and countertops in some bathrooms.

Portuguese marble **Rosa Aurora Light** was chosen for the floors, walls, shower trays and countertops in some bathrooms and kitchen. The elegant black bathrooms were clad in **Black Marquina** marble (walls and washbasin) contrasting with some pure **Glasstone White** on the floor, walls, shower trays and countertops of other bathrooms.

The outcome is elegant, bright and welcoming!
